Folder Inserters

www.komaxwv.com/fp-mailing

What is a Folder Inserter?

A folder inserter is a fast and reliable method of folding and inserting paper and documents into an envelope for mailing. Our folder inserters process your mail ten times faster than by hand, increasing productivity and making mail prep a breeze.

FPI 700

3 Feed Stations
Folds up to 5 sheets together

The FPI 700 feeds, folds, inserts, and seals up to 1,350 letters per hour, making the FPI 700 folder inserter 10 times faster than by hand.

FPI 2700

1-3 Feed Stations
Folds up to 8 sheets together

The FPI 2700 automates your mailings with smart technology and easy operation, ensuring secure and efficient processing.

FPI 5700

2-6 Feed Stations
Folds up to 10 sheets together

The FPI 5700 transforms your mail center into a powerful, automated solution. Its intuitive touchscreen makes operation simple and efficient.

FPI 5130

4-5 Feed Stations
Up to 4,300 envelopes per hour

The FPI 5130 securely automates your mailings with customizable options, including a four-feeder tower for envelopes, sheets, or inserts.

FPI 7140

4-8 Feed Stations
5,400 envelopes per hour

The FPI 6130 securely automates and customizes your mailings with reliable technology and a streamlined design for maximum efficiency.

File Based Processing

A secure, reliable solution that ensures accurate mail processing with proof of completion and privacy protection.
